Saxophone Maintenance

How to keep things working

A saxophone is an expensive responsibility and will require careful attention to keep it in prime working order. Each student is held responsible for his/her instrument. It is therefore recommended that siblings, friends and even parents without musical training should not attempt to assemble, play or clean the instrument.

NEVER EVER EVER EVER EVER EVER...

1. Get your saxophone wet. Water will damage your pads!
2. Use any product other than cork grease on your instrument!
3. Grab your instrument by the keys. Thin metal bends easily!!!
4. Use hot water to clean your mouthpiece!
5. Set your instrument down with the keys touching the ground!

Daily Care:

1. Remove saxophone from case without squeezing the keys.
2. Always wipe the neck joint with a soft cloth before assembly. Use a small amount of cork grease to the mouthpiece cork
3. Use a gentle back-and-forth motion to twist saxophone together. Don't push the mouthpiece past halfway onto the cork!
4. Do not over-tighten your ligature or screw at that holds the neck in place. This will make it harder to play and can break the screws or strip the ligature!
5. Always swab the instrument when done playing. Reeds must be removed from the mouthpiece. If left on, your mouthpiece and reed can grow mold!!!
6. Always store your saxophone in your case. **Do not put anything else inside your case, this can bend the keys.**

Monthly Care:

1. Check all screws and keys.
2. If any seem loose, take to a music store or teacher. DO NOT try to adjust them yourself. Serious damage can be caused by over/under tightening.

Yearly Care:

It is recommended that you have your instrument inspected by a professional each year. The shop may find adjustments or worn pads that are affecting the optimal performance of your instrument.

If you follow these guidelines your saxophone will last a VERY long time and will sound great the whole time!!!
